

**Turn your office into a 54 Mbps wireless hotspot.
Without frying your brain—or your budget.**

Finally. An 802.11g solution engineered—and priced—for smaller offices.

At 54 Mbps, a 3Com® 11g LAN can handle your heaviest traffic—it's almost five times faster than 802.11b. Small-office style simplicity is designed in. Plus, you enjoy the anywhere access and savings that only come with a wireless infrastructure.

Our OfficeConnect® Wireless 11g Access Points and PC Cards safeguard your data with the latest 256-bit WPA encryption algorithms. While still working seamlessly with legacy 11b clients and 128-bit WEP encryption.

Choose our OfficeConnect Wireless 11g Cable/DSL Gateway and you'll get 11g Internet access for up to 128 wireless users (253 total wireless+wired users), four 10/100 ports and security that includes a stateful packet inspection firewall. All in one budget-friendly unit.

**Now through September 30,
get a \$25 rebate on any of
3Com's hot 11g products.**

**Visit www.3com.com/wireless
