

Who Says a Worldwide Consensus isn't Possible?

U.S.A.: *"Aperto Networks' PacketWave system stood out head and shoulders above all the other competitors' systems. The company's RF and IP engineering teams and end product were superior to anyone else's."*

– Philip Urso, CEO, TowerStream

China: *"Aperto's systems have the flexibility and functionality we need to fulfill our ambitious deployment programs."*

– Jack Chu, President, Gold Mind Telecom

Poland: *"We chose Aperto's platform for the confidence it provides us in delivering reliable business-grade services. With its long-reach capability and carrier-class QoS, PacketWave is indeed the optimal broadband access platform for large-scale deployments throughout Poland."*

– Andrzej Gradzi, President, GTS Poland

More than 60 service providers worldwide in over 25 countries agree on one thing: Aperto® Networks delivers the scalability, QoS sophistication, reliability, ease of deployment and affordability they and their customers demand.

Our PacketWave® systems support multiple licensed and unlicensed bands to accommodate standards around the globe. Our systems have achieved technological leadership that appeals to service providers in any language.
